

**Инженер-технолог (жалпы бейін)**

**Process Engineer**

**Онеркәсіп, өндіріс / Онеркәсіп, өндіріс**

Кәсіпорын: Товарищество с ограниченной ответственностью "Kaz Project Operating"

Еңбекақы: 350 000 бастап 500 000 тенгеге дейін

Толық жұмыс күні, тұрақты жұмыс, еңбек жағдайы калыпты

**Бос жұмыс орын  
туралы ақпараттар**

Аймақ Атырау облысы / Атырау қ.

Лауазымдық міндеті

**Job Accountabilities:**

- Support preparation of process specifications as a basis for the engineering contractor to proceed with FEED and the detailed design of process & utility systems related to onshore and offshore projects whilst accounting for design quality, execution, time of implementation and cost.
- Overseeing process engineering design work performed by the engineering contractor, and ensuring this work is timely completed in compliance with required codes and specifications. As part of this, to review submitted engineering contractor and vendor process design documentation, such as block diagrams, PFDs, UFDs, P&IDs, heat and mass balances, data sheets, Cause & Effects, process reports, etc.
- Ensuring the use of appropriate discipline engineering standards, with appropriate consideration of international and Kazakhstan national standards and norms.
- Providing process input into technical studies, operating guidelines, design verification and technical queries for the onshore and offshore projects of NCOC.
- Participating in process safety management, including hazard identification, HAZOP, technical integrity reviews, HSE reviews and audits as required.
- Process support and assistance in the development & consistency of other discipline and general project engineering documentation.
- To assess the technology and systems to allow improvements and facilitate design and operability.
- Supporting preparation, development and approval of design engineering documentation such as datasheets, specifications and philosophies.
- Supporting development of safety critical elements and performance standards, if required.
- To ensure the development of local capabilities and provide on-job training of the assigned resources.
- Overseeing the process engineering activities in accordance with budget, schedule and quality standards.
- Advise on process equipment standardization, availability, and sparing philosophies.
- To support the Technical Services Team Lead (CSA/EIT) by supervising, reporting and updating on all the technical aspects of process engineering activities.

**Qualification & Experience Requirements:**

- Bachelor Degree or higher in chemical/process engineering
- A minimum 5 years' experience and proven track record in similar position
- Overall broad Oil & Gas facilities knowledge required but specific experience in onshore and offshore detailed design and follow on engineering to assist project definition of the detailed engineering phase.
- Experience in design and operation of high content of H<sub>2</sub>S facilities.
- Experience in design and operation of treatment facilities, with direct application in upstream oil&gas facilities and environmental protection oriented.
